2002-2003 AAAE Rates and Charges Survey Report

How do concession revenues at my airport compare with other similarly situated airports? Are my fuel flowage fees above or below average? Is my airport spending more or less per enplaned passenger than other airports?

The answers to these questions and many, many more will be at your fingertips when you order the latest Survey Report. AAAE has teamed up with Infrastructure Management Group, Inc. to bring you the most complete, user-friendly resource for airport rates and charges in North America! This past spring, airports across the US and Canada completed comprehensive surveys detailing their rates and charges as well as revenues and expenses in nearly every area of their operations. Now you can have access to all of that information!

For the fourth year, the AAAE Rates and Charges Survey Report is being offered online, as well as in print. When purchasing the published version, online access is free of charge. The online Report is an exciting product that allows users to instantly compare specific airport rates and charges data as well as other cost data across individual states, regions or the entire country with just a few clicks of the mouse. In addition, survey results are available to download and manipulate in an excel spreadsheet.

We have made several improvements this year to the survey, to ensure the most useful and relevant data to the broadest audience is gathered.

An order form is available on the back side of this document.
